

## ABSTRACT OF THE DISCLOSURE

A savory, shelf-stable, particulate, melttable, food-grade plasticized composition is disclosed, having a water activity  $A_w$  of 0.70 or below. The composition is an oil-in-water emulsion of: a protein that forms a thermally reversible melttable gel, plasticizer components to solubilize the protein, comprising a polyol plasticizer and a non-polyol plasticizer, a level of an edible oil component sufficient to provide proper texture, mouthfeel, and melt characteristics to the plasticized composition, and a savory flavoring component, and typically comprises 10-30 wt-% protein, 15-50 wt-% plasticizer component, including, based upon the total weight of the composition, 10-40 wt-% polyol plasticizer and 3-15 wt-% non-polyol plasticizer, 10-40 wt-% oil component, 5-25 wt-% moisture, and 10-40 wt-% flavor characterizing component.
